This game need to be optimize more. It looks like run in single thread and god damn lagging in my i7 PC with 64gb ram.. This game reminds me of one of those old ROTK NES games. Where they just throw you in and you have to figure out how to do everything. This is not a good thing. I'm not one for good graphics. But the graphics feel completely lazy. I suppose I should have expected this from the preview images. But I wanted to have high hopes.

The game LOOKS like you could spend a lot of time in it. But in the end it's just a typical Tower Defense game. We already have three games that does everything this tries to do the building an evil lair but do it all but better.

Check out

Keeper RL (Although it is rage inducing and certainly not perfect)

War for the Overworld

and the best one of all Dungeon Warfare 1, (2 is just past the horizon).

Hard pass on this one.
