About This Content

Only the most skilled and experienced truck drivers are called to perform Special Transport jobs. Are you up to the challenge? Experience super-sized cargoes with length and width exceeding standard cargo regulations. Drive through tight passages requiring millimeter-precision maneuvering!

Your route will be secured by two escort vehicles guiding you through the transport job from its start to the place of delivery. It's not going to be a piece of cake, but if you obey the escort vehicles' advice and carefully watch for every inch of the road to deliver the cargo in pristine condition, you can consider yourself a real pro, a true veteran behind the wheel who can deliver even the most enormous cargoes.

Quite disappointed. Contains literal game-breaking bugs related to the escort vehicles and other AI.

Briefly, you can become stuck while your escort waits for other vehicles to clear so that they can change lanes, but they never will because your wide load is blocking the lane next to you and the other AI drivers won't drive around you. Requires re-loading from an earlier save (You _did_ save, didn't you?) wherein the escort vehicles often don't load in leaving you by yourself.

This whole scenario has occurred several times and I've only had the game for 3 days. It is a frequent problem, turning the challenge and adventure of the task into one of fear and loathing.. These trailers look nice and it feels special to leave and deliver the cargo as SCS added NPC's with cameras and even TV-coverage.

But there are where the good things end.

Same as with the heavy cargo DLC the trailers are an issue, as you really can't see how wide they are you just have to "trial and crash" to see where the boundaries are.

The escort doesn't spawn at some pick up zones and they always de-spawn if you load a haul from a save also they get stuck from time to time and the only option then is to load from a previous save, which I wrote earlier de-spawns them...

There also seem to be issues with invisible barriers or objects, my guess being that the route which is pre-made hasn't been cleaned up from all road works. Some of the road works are still present but they are also scripted with "warnings" in the navigator.

Under protest and frustration I'll collect the achievements from this DLC but as SCS didn't do a good job in quality assuring this DLC it gets a "not recommend" from me.

To SCS if you read this: Put an intern on doing all the routes and report any discrepancies and re-launch this DLC. Cant seem to find jobs in job market
